ABOUT AERO PACK POS

Optimize your cloud kitchen operations with AERO PACK's all-in-one POS solution. Packed with features designed specifically for the unique needs of cloud kitchen models, our software empowers you to manage, monitor, and grow your business efficiently.

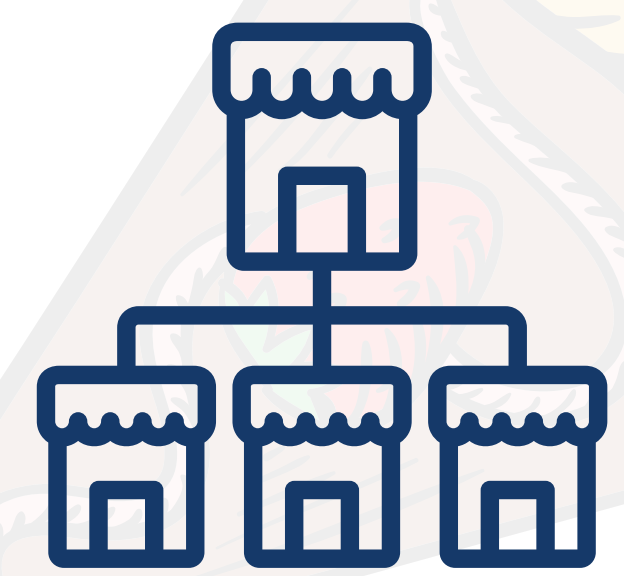

WHAT WE CAN DO FOR YOU

- **Restaurant Advisory & Consultation:** Expert guidance to optimize your restaurant or cloud kitchen operations.
- **Customised POS Solutions:** Tailored POS systems designed to meet your unique business requirements.
- **POS Equipment Installation:** Complete setup and installation of POS hardware for smooth operation.
- **Self Service KIOSK Systems:** Self-service ordering kiosks to improve efficiency and customer experience.
- **Digital Menu Installation:** Eye-catching, easy-to-update digital menus for modern food service environments.
- **Digital Signage Solutions:** Dynamic digital displays to promote offers, menus, and branding.
- **Networking Setup:** Reliable and secure network infrastructure for your restaurant systems.
- **CCTV Installation:** Surveillance system setup to enhance security and operational oversight.

CORE FEATURES POS SOFTWARE

◆ Multi-Branch Store Management

Effortlessly manage multiple kitchen locations from a single dashboard. Centralized control for pricing, menus, and operations

◆ Online Food Aggregator Integration

Seamlessly integrate with major platforms like Zomato, Swiggy, and more. Real-time order sync and streamlined delivery tracking.

◆ Smart Inventory Management

Track ingredient usage, set reorder alerts, and manage stock levels with ease. Reduce waste and never run out of essentials.

◆ Detailed Inventory Reporting

Gain insights into inventory movement, cost analysis, and stock valuation to make informed decisions.

◆ GST & Tax Reporting

Generate GST-compliant reports to simplify tax filing. Automated calculations and report generation save time and reduce errors.

◆ Profit & Loss Reports

Monitor business performance with comprehensive profit and loss reports. Get clear visibility on revenue, expenses, and net profit.

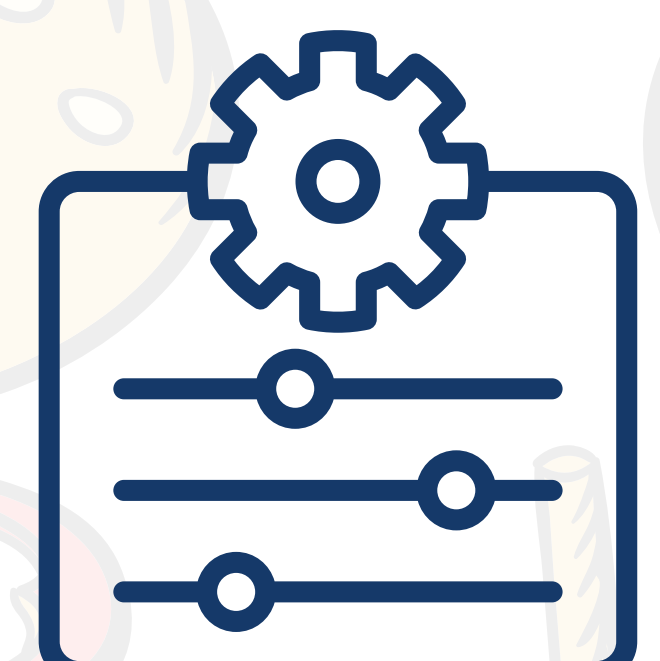

◆ HR & Attendance Management

Manage staff shifts, attendance, and payroll effortlessly. Integrate biometric or app-based attendance systems.

◆ Customizable Modules & Add-ons

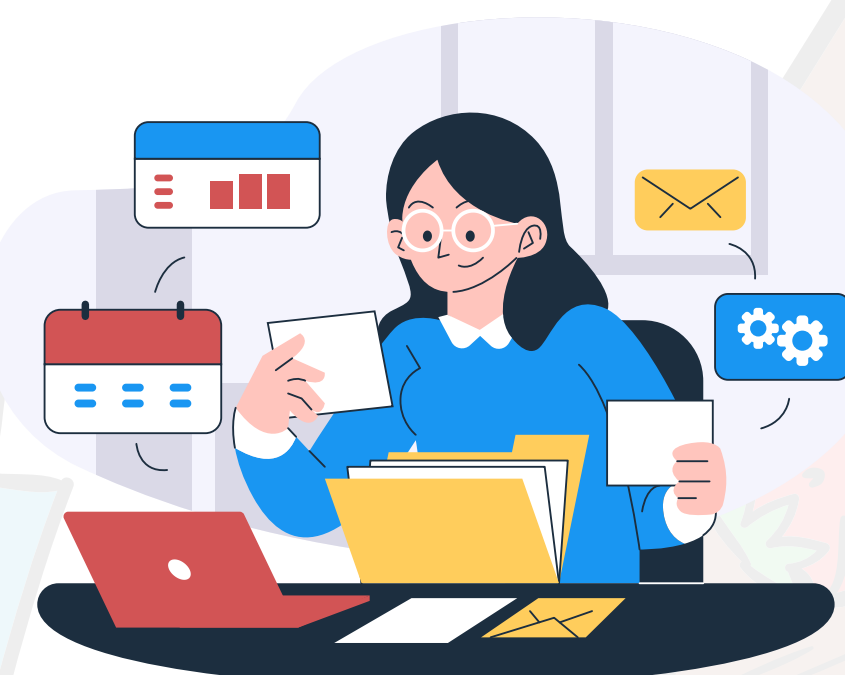

Adapt the system to your business needs with optional features and third-party integrations.

KEY FEATURES OF RESTAURANT POS SOFTWARE

◆ Order Management

Take dine-in, takeaway, and delivery orders with ease. Modify, split, or merge orders and tables.

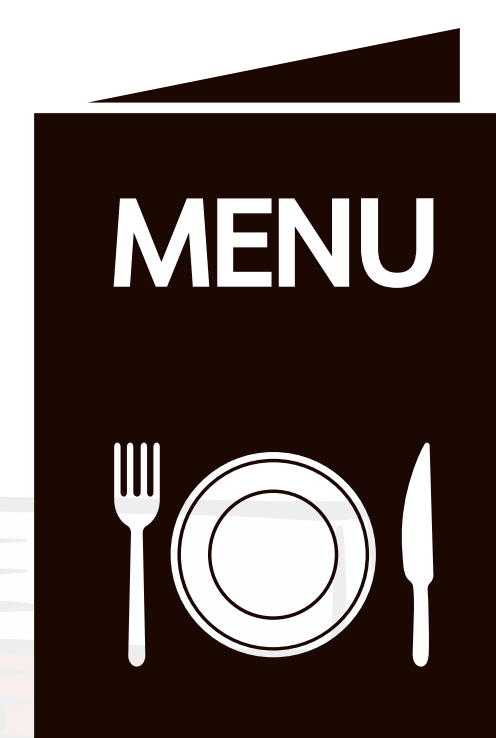

◆ Table Management

Visual floor plan with table status, reservations, and real-time occupancy tracking.

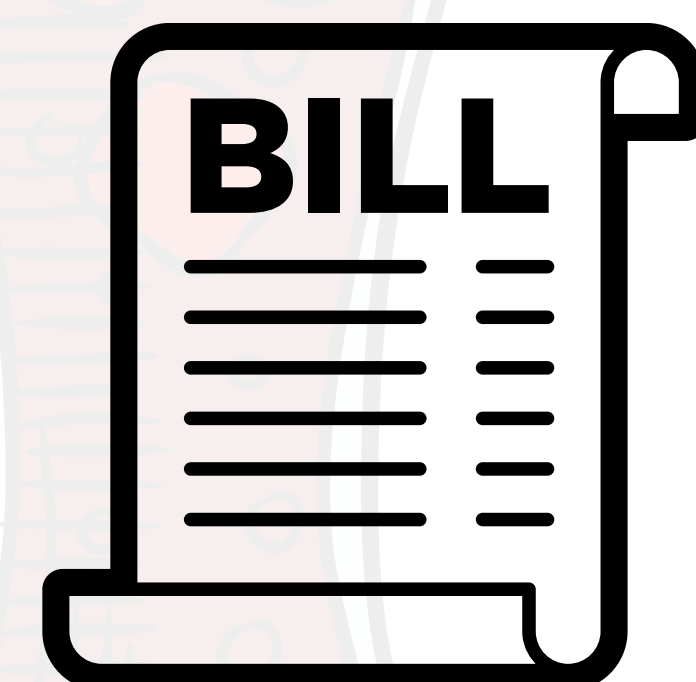

◆ Menu Management

Easily update menu items, pricing, combos, and modifiers across one or multiple branches.

◆ Billing & Invoicing

Fast and accurate bill generation with support for split bills, multiple payment modes, and GST-compliant invoices.

◆ KOT (Kitchen Order Ticket) Integration

Send orders directly to the kitchen via printers or kitchen display systems (KDS).

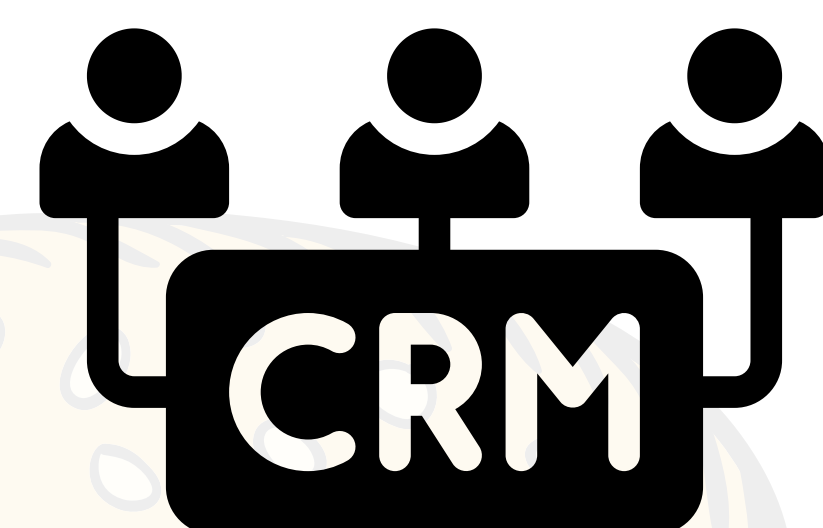

◆ Inventory & Stock Control

Track ingredient usage, stock levels, and get low-stock alerts. Reduce waste and manage procurement efficiently.

◆ Customer Relationship Management (CRM)

Store customer data, track visit history, and run loyalty programs or promotional offers.

◆ Cloud-Based Access

Monitor business anytime, anywhere from your mobile or web browser.
